DETAILED ACTION

The previous Final Office Action on 11-18-03 has been withdrawn and replaced with the following restriction. Examiner apologizes for any inconvenience.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4-9, drawn to a treatment material , classified in class 51, subclass 295.
- II. Claims 1,2 10-12, 14,15 drawn to a method of removing a coating, classified in class 451, subclass 28.
- III. Claims 13, drawn to a treatment material mixed in a paint system, classified in class 106, subclass 1.05.

The inventions are distinct, each from the other because of the following reasons:

Inventions I,II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
